(54) METHOD FOR DETERMINING WHETHER MIXED VARIETIES EXIST IN GRAIN OR NOT AND MIXED VARIETIES

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a method for simply, rapidly and accurately determining whether grains of other varieties are mixed in good-quality grains such as rice called as 'Koshihikari' or not and the mixed varieties and to provide a kit used therefor. SOLUTION: This method for determining the varieties of grains by DNA is carried out by determining whether grains of other varieties are mixed in good-quality grains or not by using a multiplex PCR method using DNA extracted from the grains or processed products thereof as a template. In the method, a pairing primer group for identification of negative band by which identification band is not expressed in a target varieties and selectively expressed in

only mixed varieties is used. This kit for identifying DNA varieties of grains comprises a pairing primer group for identification of negative band by which is not expressed in a target varieties and selectively expressed in only mixed varieties.

(54)【発明の名称】 穀粒中の混合品種の有無および混合された品種の判別方法

(57)【要約】

【解決手段】 報粒に他の品種の報فが混合しているか否かを、当該報فもしくはその加工品から抽出したDNAを鋳型とするマルチプレックスPCR法を用いて判別するに殴し、対象品種では識別バンドを発現せず、混合品種のみに選択的に発現するネガティブバンド識別用対台ブライマー群を用いるととを特徴とする報類のDNA品種判別方法。並びに対象品種では識別バンドを発現せず、混合品種のみに選択的に発現するネガティブバンド 識別用対台ブライマー群を含むことを特徴とする報類のDNA品種判別用キット。
